PROFESSIONAL SUMMARY

Results-driven Frontend Developer with **2.5+ years of experience** building scalable, high-performance user interfaces for **AI-driven and data-intensive applications**. Proficient in HTML, CSS, JavaScript, React, TypeScript, and SASS, with a strong focus on user experience, performance optimization, and responsive design. Delivered multiple production-ready web applications and solved **800+ DSA problems**. A collaborative problem-solver eager to contribute to impactful engineering teams.

WORK EXPERIENCE:

Hypergro.ai

SoftwareDevelopment Engineer – 1   Apr 2024 – Present

- Delivered and scaled high-impact, production-grade products from scratch using modular component systems, performance optimizations, and **multi-tenant architectures.**
- Developed a **chat-based AI ad generation system** featuring integrated tools for image, video, and audio creation, optimized for scalable, asynchronous workflows.
- Rapidly built and iterated on **pixel-perfect, SEO-optimized** landing pages, combining strong **UI/UX principles, responsive design, and performance** best practices to improve user engagement and conversion readiness.
- Owned **deployments, analytics, SEO,** and **UI quality**, achieving 99.9% uptime, improving insight accuracy by 35%, reducing UI bugs by 30%, and mentoring 3 interns.

KBinfospace

Frontend Developer   Apr 2023 – Mar 2024

- Built a complete company website from scratch using **React, TypeScript, and Material UI** for a modern, responsive frontend, with **Firebase** powering authentication (sign-in/sign-up) and backend services; implemented **SEO** best practices to improve search visibility and overall performance.
- Handled frontend development, **debugging, bug fixing, and testing** to ensure high-quality deliverables.

SKILLS:

- **Frontend**: TypeScript, JavaScript, React, Next.js, Qwik.js, Solid.js, Tailwind, HTML, CSS, ShadCN
- **Backend**: Node.js, Express.js, Firebase
- **Database**: MongoDB
- **Tools & DevOps**: Git, GitHub, Webpack/Vite, vsCode, Postman, Figma
- **Core Competencies**: Data Structures & Algorithms, UI/UX fundamentals, performance tuning, SEO

RELEVANT PROJECTS:

E-Commerce Website| 🔗 Live| 🔗 Github

Flipkart-style e-commerce web application for browsing and purchasing products online.

- Built **product listings, cart, checkout, and Firebase-based authentication** (login/signup).
- Developed a **responsive UI with React and Chakra UI** for smooth navigation and usability.

EDUCATION:

Bachelor of Computer Applications | September/2023 - September/2026
Vivekananda Global University, Jaipur

Full Stack Web Development | July/2022 - April/2023
Masai School, Bangaluru
